Create Presentations in Minutes

If you've ever tried to create good-looking, professional presentations for your webinars, courses, tutorials, VSLs, YouTube videos, and more... then you've probably tried PowerPoint, Prezi, and maybe a few other presentation tools.

But there's a problem — there either difficult to master, look like they were made in 1998, are too expensive, cheesy, or just don't help you create the kind of presentations that will grab attention and get people to take action.

That's why I was excited about a new presentation tool on the market called Prezentar, which claims to be a simplified, cloud-based app that allows you to create professional presentations fast, easy, and without the usual monthly fees, you'll get from tools like PowerPoint or Prezi.

So, is Prezentar going to replace PowerPoint and help you create presentations for webinars, videos, and other types of content faster and easier than ever before?

In this review, I'll give you my honest opinion, as I reveal the truth behind this intriguing new tool, so you can decide whether it's worth the money and if it's right for you.

What is Prezentar

Prezentar is a cloud-based app that allows you to create modern, niche presentations quickly and easily, without steep learning curves, additional plugins, or any crazy design skills.

And because it's mostly template-driven, the hard work is already taken care of.

You just log in, pick a template, tweak it, then share it with the world (you can also convert it to a VIDEO or export it as PDF or HTML too.)

My first impressions were pretty good

One thing Prezentar does well is SIMPLICITY.

Even though it's packed full of tons of powerful features, you'll never have to spend hundreds of hours trying to figure out how to use it!

It's packed with amazing templates and has a huge media library that blows Microsoft out of the water.

Plus, if you've ever used PowerPoint, you'll know how cheesy and dated their templates look, especially if you're trying to create a modern template for niche marketing.
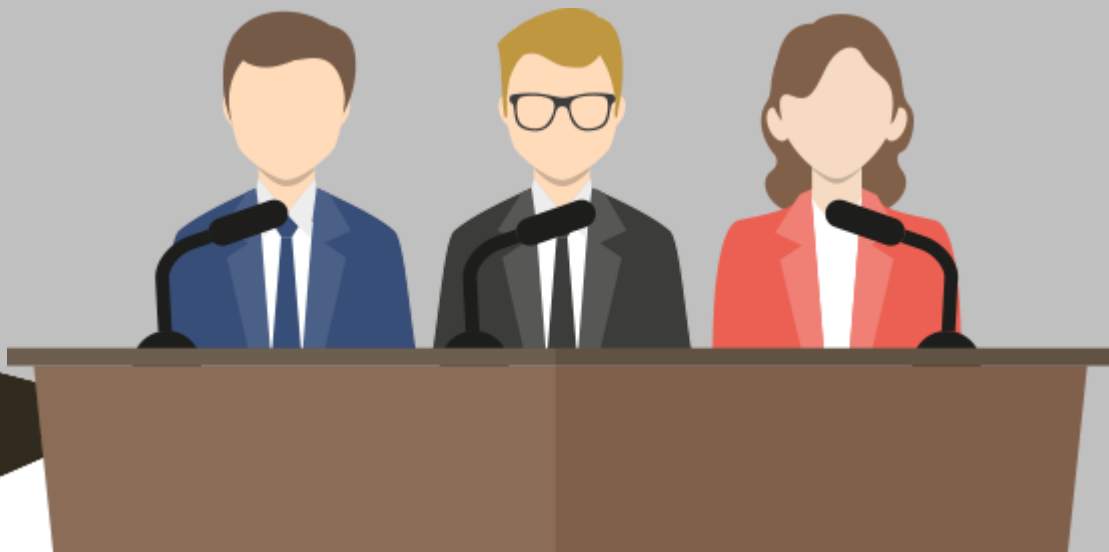

This is where Prezentar really shines through

Their templates are superb, and you get access to 15 categories of niche designs, including templates in marketing, finance, sports, health, food, hobbies, languages, and many more.

Some of the nicest designs, color pallets, and overall concepts I've ever seen, along with thousands of modern, stylish graphics, animations, icons, and images at your disposal, ready to insert into your presentations with a single click.
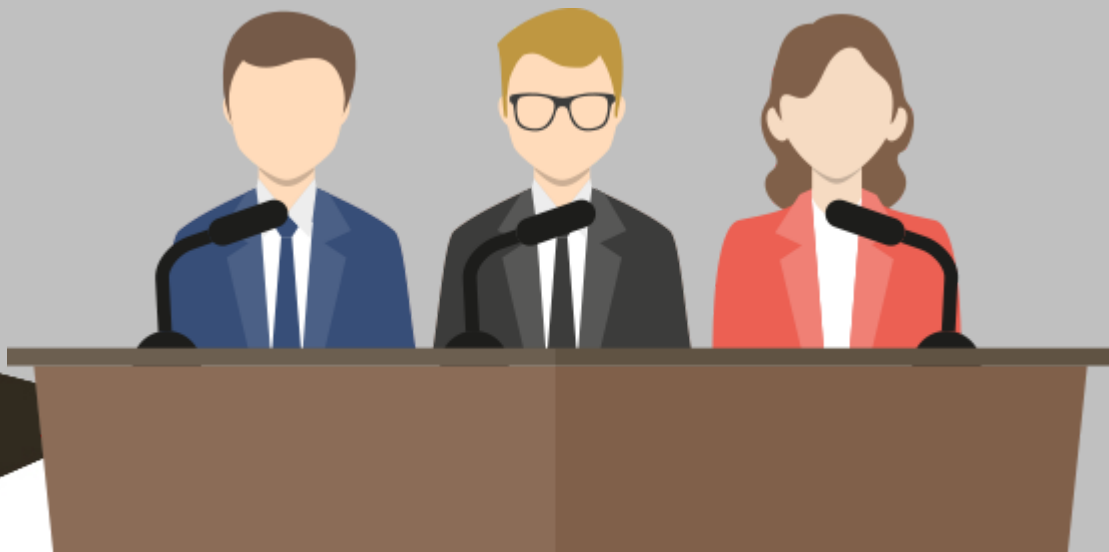

This is clearly a tool for presentation DIYers who want to get powerful, engaging, and persuasive presentations made up fast, without hiring freelancers or blowing wads of cash on tools they don't need.

In fact, there are no monthly fees at all, and the upfront cost is so ridiculously low, I actually wonder if they're losing money during their launch?

Either way, here's the breakdown of the features Prezentar is packing

 50 amazing templates (fully customizable)

 Custom branding — add your own logo in

 Super simple drag and drop editor

 500+ Google fonts

 50+ Text & Image effects

 8000+ Stock images

 250+ HD Slide backgrounds

 Interactive Animations

 Audio & Music Studio

 Online web stock search

 Upload your own images

 Save projects in the cloud

 Image crop tool

 Social media sharing (Facebook, Twitter, Pinterest, LinkedIn, etc)

 Share publicly via URL

 Built-in audio recorder, editor, and music studio

 Export to PDF, HTML, and Video

 Commercial License (sell services to clients)
 Agency website (comes with a portfolio)

Not too shabby, eh?

That's a lot of presentation firepower at your disposal for way under $100.

A lot of these graphics and templates alone could set you back $200 or more.

So, one thing is certain — Prezentar is packing heaps of value.

Who is Prezentar for?

Prezentar is clearly for the busy marketer or small business owner who is looking for a fast, low-cost way to pump out amazing professional presentations without any steep learning curves.
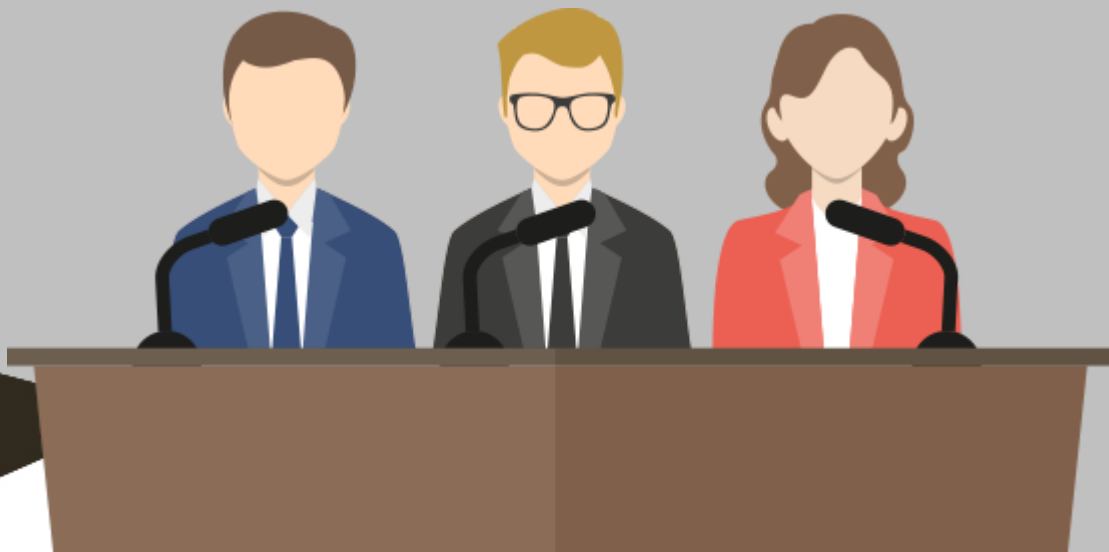

It's for people like you, who just want to grab a beautiful template, drag and drop stuff around, tweak, turn it into a video and then share it with their audience in minutes.

It's for people who need professional presentations in a hurry, without huge upfront fees or ongoing monthly bills.

You can use Prezentar to create presentations for:

 Video courses (Udemy, etc.)

 Tutorials

 Webinars

 Demonstrations

 Content Videos

 Video Sales Letters (VSLs)

 YouTube videos

 Facebook videos

 Landing page videos

 Seminars and events

 Pitch decks for investors

 Classrooms or meeting rooms

How much does Prezentar cost?

Normally $197, but the special launch price is a low one-time price of $47.

Are there any upsells?

Prezentar has 4 upsells. You don't really need all of them to use Prezentar, but I highly recommend them as they'll come in useful depending on your situation and usage. (Besides, they're available for a one-time price, making it even more irresistible.)

The upgrades available are:

Upsell 1: Prezentar PROFESSIONAL

Prezentar Professional is the turbocharged, or 'fully-loaded' version of Prezentar. It will unlock 150 more templates (the best ones are in here), slides, graphics, icons, features, animations, and more!

Prezentar is also loaded with an awesome Video Sales Letter creator, which is "locked/hidden" until you upgrade. This is a separate product that's built into Prezentar, allowing you to create good-looking video sales letters that convert like crazy.

In fact, this video sales letter creator helps you quickly create the same types of video sales letters that are proven to convert up to 10% higher than regular sales pages! There's also a 'text to slide' generator inside allowing you to paste your script and it'll instantly turn them into slides!

You can then record your voice directly through the dashboard, add music, plus edit it with no extra software or plugins required.

Great for those that want more variety, templates, and power.

Highly recommended.

Upsell 2: Prezentar XFACTOR

This gets you $1,500 worth of fresh, modern presentation templates, graphics, slide backgrounds, and icons each month for a full year, for just one small fee (there are zero recurring charges).

Great for keeping your presentations unique and grabbing attention from month to month (perfect for agencies and other high usage marketers).

It's incredible value as it works out to a price of a Starbucks since you get templates loaded into your dashboard every month for a whole year for a small one-time price.

Upsell 3: Prezentar HALO (a powerful 4-in-1 software suite

This upgrade is a real beast.

You get 4 powerful apps to help you leverage your presentations for more traffic and sales.

They are:

 Flipbook Creator APP. A stunning tool that allows you to turn your presentations into interactive flipbooks that people love right now!

 3D Rotating Carousels APP. A cool design app that showcases your presentation slides and any other content in a spinning carousel that grabs attention and gets people engaged in your content like nothing else I've ever seen before!

 Hypnotic Transitions APP. A set of professional presentation slide transitions that keep your audience engaged and move them through your slides smoothly, all the way to your sales pitch!

 HD Background Skins APP. A bunch of cool video player backgrounds that draw people's attention to your video to increase views, leads, and sales.
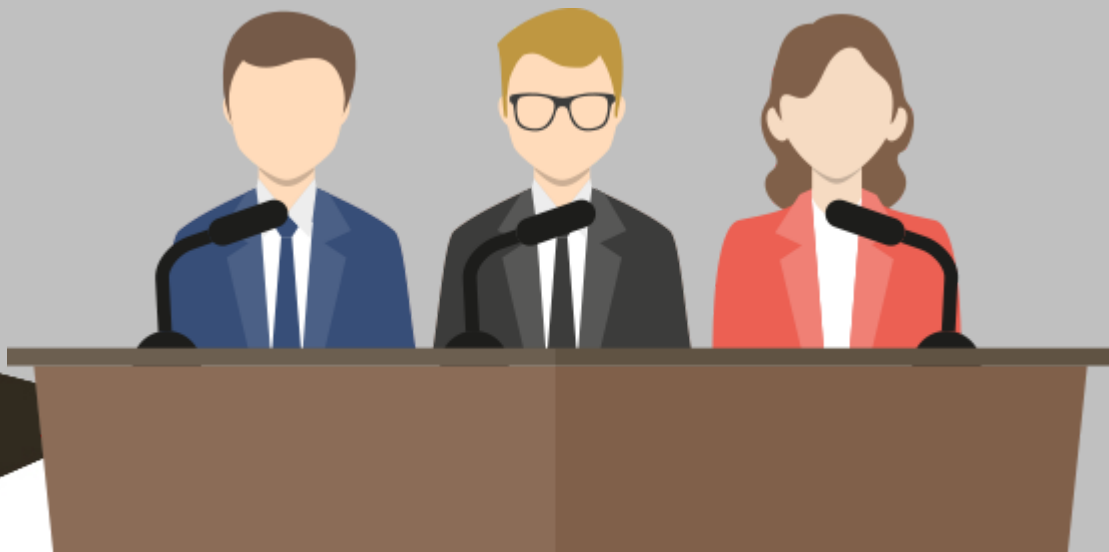

Upsell 4: Prezentar's Auto Job Finder (gets you clients instantly)

Since Prezentar comes with a commercial license this upgrade is a great addition to help you make money.

If you're going to be using Prezentar to create presentations as a service to get paid, then Prezentar's Auto Job Finder is something that you need.

It will automatically find you fresh jobs and clients from across various freelance websites and notify you so that you can fulfill them.

A huge time saver and money earner. Some clients will pay as high as $2,000 for you to create and design presentations for them!
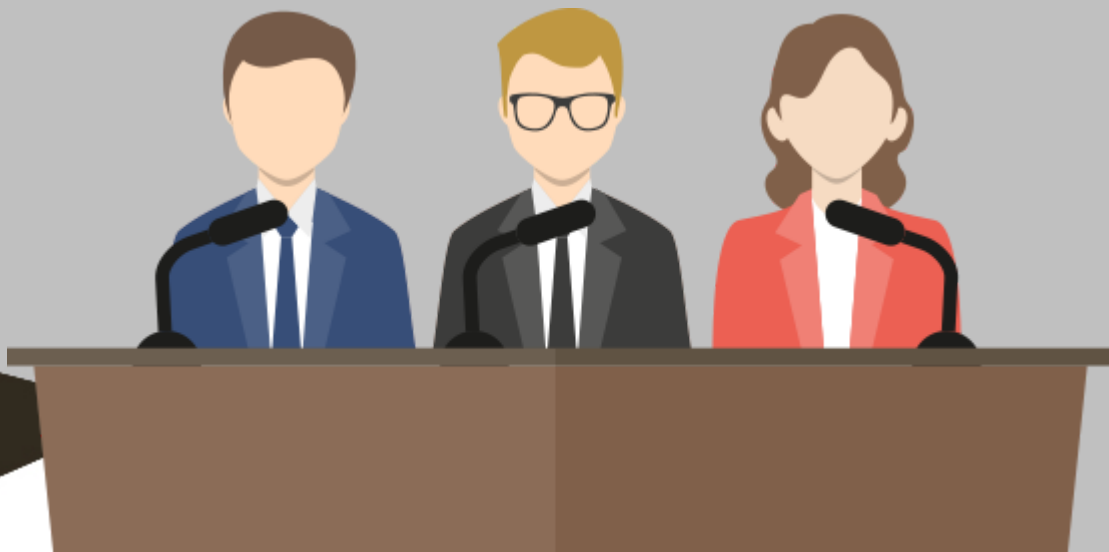

Upsell 5: Prezentar Agency Edition

Create presentations faster with teams!

Want to start an agency or currently run one and want to scale and serve more clients?

Well, now you can add 25 additional team members to your account to maximize your productivity, clients, and revenue worldwide remotely!

Generate a six to seven-figure income with Prezentar Agency edition, your backbone for a centralized workforce in a global team account where everyone can collaborate.

What I loved about Prezentar...

Earlier I mentioned how Prezentar might be too simple for some people, but personally, that's exactly what I love about it most!

I've never seen such a simple yet powerful presentation tool. It's just so easy to use.

You grab a niche template, drag and drop things around, insert or remove elements, then tap to publish.

There are no crazy control panels.

No steep learning curves.

No need to Google for help.

Oh, and no need to download software, because it's 100% cloud-based.

If you're busy and need to create modern presentations fast, for your courses, webinars, tutorials, sales videos, and whatever else, from anywhere in the world... this IS the tool for you.

What does this matter?

I'm not sure about you, but I can tell a lot about a product based on who's behind it. If the product was created by someone with a solid track record and a superb reputation for getting results for his users, then I'm already more willing to try their latest tool out!

He's created products such as Sqribble and Pixel Studio FX, which have sold tens of thousands of copies worldwide. Prezentar is set to be the next big smash hit that you should get your hands on.

Final thoughts...

Prezentar is aimed at busy people who just want to get the job done fast, without steep learning curves, and getting lost in a bunch of features you don't need and won't use.

Thanks to the amazing point-and-click templates, huge media library, and super simple drag and drop design editor, you can pump out engaging presentations in minutes, not hours or days.

You can also record audio through the software and export your presentations to video, or PDF, and share them online immediately.

No need to hire freelancers.

No need to spend hundreds on software licenses.

No monthly fees.

It also comes with a commercial license and agency website, allowing you to generate an income selling services to clients!

THANK YOU
